

## ESTABLISHING SITE EFFICIENCIES THROUGH ADAPTABILITY AND PLANNING

CAHill Resources LLC is proud to provide a full range of site services, logistics, and horsepower that can strengthen project performance and fill critical gaps on complex construction sites. As a small subcontractor, our team is uniquely nimble, efficient, and adaptable, responding quickly to client needs and shifting project conditions, priorities and timelines.

Our mantra is "Say Yes."

We are "For Others, By Others."

Our work on the **New Buffalo Bills Stadium** project demonstrates this versatility in action. In 2023, as a second tier sub, our operators supported the early stages of construction on the Mass Excavation and site preparation, laying the groundwork for a safe and efficient foundation build. During the 2024 Foundation phase, the CAHill crew was critical in ensuring the project continually hit milestones. A few highlights include designing a dewatering and ice melt system leveraging unique hydroexcavation practices, and delivering critical rock anchor support work, ensuring forming crews had inspection-approved excavation surfaces. During the winter of 2024-2025, the CAHill operator crew provided snow removal surfaces for the entire jobsite, inclusive of but not limited to employee parking, work access roads, entrance gates, load zones, material laydowns and vehicle egress areas.

Hitting the ground running as one of the first companies at the start of the Buffalo Bills New Stadium, CAHill has now served

**50+**  
contractors.

In 2025, our site services expanded to include material handling and logistics coordination for a variety of companies. We ensure deliveries of materials and equipment are managed safely and seamlessly across the complex, ever-changing jobsite.

In 2025 alone, the CAHill team has performed **6,000+ field service jobs** that include the scheduling, unloading and rehandling of equipment and materials to work stations for ALL onsite deliveries for the following:

- HVAC units: Tech Building and Stadium
- Mechanical pipe systems
- Weather proofing
- Paint
- Drywall/ceiling tile
- Fireproofing
- Fire suppression/sprinkler systems
- Kitchen and restaurant equipment
- Specialty steel
- Frelin glass
- Stadium seating
- Hydrotherapy pools
- Lockers for locker rooms
- Sign steel and signage material
- Deliver FUEL service
- Deliver WATER service
- SLURRY removal
- STONE delivery
- SAFETY service

Our skilled laborer and operator teams have also played a critical role in numerous Prime contractors daily operations. We have assisted Gilbane Turner and Primes with:

- environmental conditions control support
- water service for pressure testing of plumbing and mechanical systems
- deep-trenching/excavation for sod field drainage systems

General site maintenance services such as construction and maintenance of concrete washout stations, wheelwash systems and ensuring a clean, organized, and productive environment. As a sub contractor to the Suites Drywall contract our laborers have been indispensable to the carpentry crews, coordinating the delivery, placement and removal of all materials—because nothing can get done on site without materials moving efficiently and safely. As a sub to the Landscaping Package we have performed asphalt paving, excavation, topsoil and cushion sand placement. As a sub to the sporting field contractor we have installed the ACO drain and PEX systems for the running track sub-surface.

Our team has conducted  
**200,000+**  
hours in contracted labor  
work for clients.

## SPECIALTY LOGISTICS & LIFTING

CAHill Resources also fulfills the need for lifting major building infrastructure and operating equipment. Our Operators hold down the seat in this role by skillfully running a fleet of All-Terrain Forklifts, ROTO telehandlers and cranes. Our overall deep understanding of onsite management ensures materials and equipment are safely and efficiently elevated to various levels and locations within the project site.

Through our Managed Equipment Services, clients gain access to a team of scheduled, reliable operators and our well-maintained machinery, which help maintain project momentum and minimize downtime. This integrated service approach allows CAHill Resources LLC to fill in the gaps where larger companies cannot, providing dependable, responsive support that keeps progress steady and consistent.

At CAHill Resources LLC, we remain committed to efficiency, safety, and collaboration—values that define our work and drive results. Our adaptable approach ensures that no matter the challenge, our team continues to deliver quality service and measurable value on every project. #forothers
